## LABOR.

Its Relative Condition in Europe and America.

A Large Dose of Taffy from the State Department.

Washington, Aug. 5.—Reports from the United States consuls in Europe show that wages in the United States are double those of Belgium, Denmark, France and England, and three times those of Germany, Italy and Spain, and four times those of the Netherlands; that the prices of the necessities of life are lower in the United States than in Europe; that more misery exists from strikes, drinking, socialism and communism in England and Germany, than from all other causes combined, hard times included. The state department adds to the above synopsis of the reports which it has prepared for publication the following remarks:

The reading of these reports will remind many of our naturalized working men who are so fierce in denouncing the condition of affairs in the United States of the hopeless condition of that labor from which they escaped by emigration to this republic and open their eyes to the superior position of the workingmen of this country. It will show our native workingmen the difference between labor disfranchised, impoverished, degraded and hopeless in Europe and labor free, independent, honorable and an equal sharer in political power in America.

### THE PACIFIC COAST.

Attempts to Recover the Foundered Steamer "Brother Jonathan" with \$1,000,000 Treasure—The News Story Not Believed.

San Francisco, Aug. 5.—Some parties in this city who have been working the matter up for some time past, have discovered the wreck of the steamer Brother Jonathan, which foundered off Point St. George, near Crescent City in July 1865. She lies in an upright position in twenty-two fathoms of water, about fifty fathoms from the submerged rock upon which she is supposed to have struck. There was about \$1,000,000 in treasury notes and Bullion in her safe and the finders are fitting out an expedition for its recovery. The treasure belonged to the government whose claim to the hold lapsed on the expiration of ten days after the loss.

The Alaska Fur Company are disposed to consider the reported escape of the Nordensky, old steamer Vega from the ice in the Arctic, a canard. They have late advices from that neighborhood, to the effect that the season has been very late on the Asiatic side. Strong east winds have prevailed, piling up the ice in such a manner as to render it, in their opinion, impossible that the Vega should have succeeded in working out.

### CHAS. FECHTER.

Death of the Eminent Actor Last Night.

Quakertown, Pa., Aug. 5.—Chas. Fechter, the actor, died last night at his farm at Richmond Center. He was fifty-four years of age, and had been ill since early in the spring with a complication of diseases of the liver and kidneys. The immediate cause of death was dropsy and jaundice.

The United States Hotel stakes were won by Volcano, Harold 2d, Bulwark 3d. Time, 2:41. Harold sold in the pools at 600 to 160 for Volcano.

### LABOR.

Its Relative Condition in Europe and America.

A Large Dose of Taffy from the State Department.

Washington, Aug. 5.—Reports from the United States consuls in Europe show that wages in the United States are double those of Belgium, Denmark, France and England, and three times those of Germany, Italy and Spain, and four times those of the Netherlands; that the prices of the necessities of life are lower in the United States than in Europe; that more misery exists from strikes, drinking, socialism and communism in England and Germany, than from all other causes combined, hard times included. The state department adds that the above synopsis of the reports which it has prepared for publication the following remarks:

The reading of these reports will remind many of our naturalized working men who are so fierce in denouncing the condition of affairs in the United States of the hopeless condition of that labor from which they escaped by emigration to this republic and open their eyes to the superior position of the workingmen of this country. It will show our native workingmen the difference between labor disfranchised, impoverished, degraded and hopeless in Europe and labor free, independent, honorable and an equal sharer in political power in America.

#### THE PACIFIC COAST.

Attempts to Recover the Foundered Steamer "Brother Jonathan" with \$1,000,000 Treasure—The News Story Not Believed.

San Francisco, Aug. 5.—Some parties in this city who have been working the matter for some time past, have discovered the wreck of the steamer Brother Jonathan, which foundered off Point St. George, near Crescent City in July 1865. She lies in an upright position in twenty-two fathoms of water, about fifty fathoms from the submerged rock upon which she is supposed to have struck. There was about \$1,000,000 in treasury notes and Bullion in her safe and the finders are fitting out an expedition for its recovery. The treasure belonged to the government whose claim to the hold lapsed on the expiration of ten days after the loss.

The Alaska Fur Company are disposed to consider the reported escape of the Nordenskiold old steamer Vega from the ice in the Arctic, a canard. They have late advices from that neighborhood, to the effect that the season has been very late on the Asiatic side. Strong east winds have prevailed, piling up the ice in such a manner as to render it, in their opinion, impossible that the Vega should have succeeded in working out.

Trouble and Katie P. started in the steeple chase. The former was favorite, and won. Time, 2:58.

A Correction.

To the Editor of the SENTINEL:

In looking over your paper of August 2nd, we noticed an item relative to the mistake made in laying foundation stone for the temple to the effect that the contractors claimed the architect made the mistake. This is not the case, as we in no way cast any blame whatever on Messrs. Tolan & Son. Respectfully,

## NOT GUILTY.

But Then They Musn't Do So Any More.

Result of the Investigation By the Police Committee.

The investigation into the alleged misconduct of Policemen Roelle and Humbrecht was resumed by the police committee yesterday afternoon.

Conrad Auer testified that he had heard some boys say they were going to call on Mrs. Kincaid and had told the police.

Jacob Klaus stated that Mrs. Beyersline told him that Jim Clark was a frequent caller upon Mrs. Kincaid.

Mrs. Kincaid being indisposed to file charges, and not desiring the punishment of the two peccers, the committee prepared the following report: To His Honor the Mayor:

It appearing to the satisfaction of the committee on police, after a thorough and impartial investigation into the alleged acts of Policemen Roelle and Humbrecht in entering the residence of Mrs. Kincaid, 304 East Jefferson street, in search of an offender at the hour of 2 a. m., on Thursday last, that the officers were most grievously in the wrong, and that the charges have been preferred for no other reason than the gratification of a personal vendetta, together with an explanation of the law and some much-needed wholesome advice, we would have a salutary influence upon the department as an entirety, and the accused officers especially.

E. L. CHITTENDEN, S. BASH, Committee on Police and Prisons.

Mayor Zollinger accordingly administered a slight reprimand to the officers, together with some instructions as to their powers and duties under the law, and some wholesome advice as to their conduct.

The police committee and mayor also agreed upon the following excellent order:

To W. B. Smith, Chief of Police: You will instruct the members of your force to make no arrests, neither to enter private houses for the purpose of arrests save with proper writs, or by virtue of legal instructions from yourself or mayor. The lack of judgment and discretion exhibited by divers members of your force calls for some order of this character. Houses are not to be entered by your men without a proper writ, or by your order, except from this office.

Signed E. L. CHITTENDEN, S. BASH, Committee on Police and Prisons.

Approved Aug. 4th, by U. A. ZOLLINGER, Mayor. It is only fair to say that Humbrecht and Roelle stand A. No. 1 as officers, and that in the present case they were guilty of nothing more serious than an error of judgment.

## THE RAILROADS.

Chas. Printz is shoveling coal on a Wabash steamer.

Will S. O'Rourke returned from Petoskey last night.

Engine No. 139 is in the Pittsburgh shops being repaired.

H. Bromley, general freight agent of the Jackson road, is in the city.

E. A. Fisher, excursion agent of the Wabash, was in town last evening.

No. 1 on the P. F. W. & C. Ry., to-day, carried seventy-eight emigrants bound for Minnesota.

Ed. Stanley, of the Pittsburgh, who has been recruiting for the past month, returned to work last evening.

Robert Learmouth and C. H. Walton went west on the Pittsburgh this morning on a tour of inspection.

Conductor Mace Long, of the Pittsburgh road, who has been laying off for the past month, returned to duty last evening.

Engine No. 268, Byron Holmes, engineer, will be out of the Pittsburgh shops in a few days. It has been entirely rebuilt.

The Jackson road is shortly to be sold on foreclosure. It is rumored in railroad circles that Tom Mcegan, Dicky Phowler and Pat Conover have formed a pool for the purpose of buying it.

There is considerable figuring and wire-pulling among the Pittsburgh engineers as to who will handle the throttle on the "big 157." Frank Whitney, of the 214, apparently has the inside track.

Engine 157, the great mogul of the Pittsburgh, was placed on her trucks, but had to be taken off again, owing to the fact that there were no springs heavy enough to hold her. As soon as springs can be procured she will be ready to go out.

Some time ago the Wabash railway company made an order that no cars loaded with lime should be forwarded off their track. This was regarded as a death-blow to one of the chief interests of Huntington county, where immense quantities of lime are burned, and it is understood the company has been induced to modify the order.

Hay Fever.

To the Editor of the SENTINEL:

The hay fever season is fast approaching, and it is therefore not out of season to say something about it. No doubt many would like to know something about the disease. According to my understanding, the disease called hay fever is a summer catarrh (different from ordinary catarrh) and is consequently misnamed. This disease is unmistakably on the increase, and to a certain degree is a most baffling affliction. A variety of names have been given it, and numerous drugs have been put forth as curative agents. No doubt many of these, at times, have good effects; yet there is no certainty in their action, and the prescribing of them has been a sort of guess-work. In some cases this disease assumes the form of spasmodic asthma. There is often a discharge from the eyes and nose, with sneezing, mucous flux and catarrh. Dr. Tullar, in his etiology of hay fever, says:

"We must, more than in almost any other disease, draw a sharp distinction between the predisposing and the existing causes; for it must be strikingly apparent throughout that this affection is exclusively confined to certain individuals, in whom certain definite predisposing influences were to be assumed. With these persons the disease appears year in and year out, with more or less regularity, often under the most different external conditions. In regard to sex, the male is less frequently afflicted, 104 females to 50 males being the proportion."

Dr. Blackley, an English physician, who has also written a work on hay fever, remarks (which remarks I am not inclined to accept): "The patients belong exclusively to the educated classes—the clergy, officers, lawyers, physicians, merchants and their relatives." I think all classes, constitutions and temperaments, particularly the nervous, are liable to this disease.

As to the treatment, I regard local applications to be the most proper. My own experience has proved to me that those who have used local applications by the atomizer and other inhaling apparatuses, with well suggested therapeutical means to suit their cases, have found not only much comfort, but great benefit. Of internal remedies, one of the best I believe, to be Polier's arsenical solution, taken in doses of two to five drops, three times a day, in water. Sulphate of iron, with or without sulphate of quinine, is most valuable if there be much debility. The distinguished German physician and savant, Helmholz, reported in Virchow's archive that he has succeeded in finding vibrios in his own nasal secretions when suffering from this form of catarrh (hay fever). He also states that a saturated neutral solution of quinine used for the nasal passages afforded great relief. I cannot speak too well of that remedy if well and intelligently applied by the nasal atomizer. I think that this disease, and those who are predisposed to it, are aggravated by solar heat. I would, therefore, advise all those persons to keep out of the sun and pass the heat of the day in a cool, well shaded apartment. The diet should be generous, and a moderate allowance of wine or weak brandy and water should be taken with meals. Cold salt water bathing is good as a means of strengthening the system, as well as of conquering that morbid nervous sensibility of which the essence of the malady consists.

Y., his affection being that hopeless malady, Bright's disease of the kidneys. Indeed from last advices it is more than probable that he has, before this, breathed his last.

One of the telephone men recently made a decided mash on Holman street. The young fellow sent a number of tender missives expressive of love and adoration. **A Correction.**  
To the Editor of the SENTINEL:

In looking over your paper of August 2nd, we noticed an item relative to the mistake made in laying foundation stone for the temple to the effect that the contractors claimed the architect made the mistake. This is not the case, as we in no way cast any blame whatever on Messrs. Tolan & Son. Respectfully,

HUESTON & Co.

**NOT GUILTY.**  
But Then They Musn't Do So Any More.

**Result of the Investigation By the Police Committee.**

The investigation into the alleged misconduct of Policemen Roelle and Humbrecht was resumed by the police committee yesterday afternoon.

Comrad Auer testified that he had heard some boys say they were going to call on Mrs. Kincaid and had told the police.

Jacob Klaus stated that Mrs. Beyersline told him that Jim Clark was a frequent caller upon Mrs. Kincaid.

Mrs. Kincaid being indisposed to file charges, and not desiring the punishment of the two police men, the committee prepared the following report: To His Honor the Mayor:

It appearing to the satisfaction of the committee on police, after a thorough and impartial investigation into the alleged acts of Patrolmen Roelle and Humbrecht in entering the residence of Mrs. Kincaid, 304 East Jefferson street, in search of an offender at the hour of 2 a. m., on Thursday last, that the officers erred most grievously in so doing, and while no charges have been preferred nor any desire expressed by the aggrieved lady to have them dismissed from the service, we still believe that a reprimand administered in your honor, together with an explanation of the law and some much-needed wholesome advice, will tend to have salutary influence upon the department as an entirety, and the accused officers especially.

S. E. CHITTENDEN,  
S. BASH,  
CHAS. REESE,  
Committee on Police and Prisoners.

Mayor Zollinger accordingly administered a slight reprimand to the officers, together with some instructions as to their powers and duties under the law, and some wholesome advice as to their conduct.

The police committee and mayor also agreed upon the following excellent order:

To W. B. Smith, Chief of Police:

You will instruct the members of your force to make no more raids, neither to enter private houses for the purpose of arrests save with proper writs, or by virtue of oral instruction from yourself or mayor.

The lack of judgment oftentimes so grievously exhibited by these men, whereby they have caused so much trouble and expense to the city, is hereby called for some order of this character.

Houses not to be entered by your men, except on the basis of a warrant, or of course, exempt from this order.

Signed,  
S. E. CHITTENDEN,  
S. BASH,  
CHAS. REESE.

Approved Aug. 4th, by  
C. A. ZOLLINGER, Mayor.

It is only fair to say that Humbrecht and Roelle stand A No. 1 as officers, and that in the present case they were guilty of nothing more serious than an error of judgment.

**THE RAILROADS.**

Chas Printz is shoveling coal on a Wabash steamer.

Will S. O'Rourke returned from Petoskey last night.

Engine No. 139 is in the Pittsburgh shops being repaired.

H. Bromley, general freight agent of the Jackson road, is in the city.

H. A. Fisher, excursion agent of the Wabash, was in town last evening.

No. 1 on the P. F. W. & C. Ry., to-day, carried seventy-eight emigrants bound for Minnesota.

Ed. Stanley, of the Pittsburgh, who has been recruiting for the past month, returned to work last evening.

Robert Learmouth and C. H. Walton went west on the Pittsburgh this morning on a tour of inspection.

Conductor Mace Long, of the Pittsburgh road, who has been laying off for the past month, returned to duty last evening.

Engine No. 263, Byron Holmes, engineer, will be out of the Pittsburgh shops in a few days. It has been entirely rebuilt.

The Jackson road is shortly to be sold on foreclosure. It is rumored in railroad circles that Messrs. Meegan, Dickey Phoebe and Pat Conover have formed a pool for the purpose of buying it in.

There is considerable figuring and wire-pulling among the Pittsburgh engineers as to who will handle the throttle on the "big 157." Frank Whitney, of the 214, apparently has the inside track.

Engine 157, the great mogul of the Pittsburgh, was placed on her trucks, but had to be taken off again, owing to the fact that there were no springs heavy enough to hold her. As soon as springs can be procured she will be ready to go out.

Some time ago the Wabash railway company made an order that no cars loaded with lime should be forwarded off their track. This was regarded as a death-blow to one of the chief interests of Huntington county, where immense quantities of lime are burned, and it is understood the company has been induced to modify the order.

**Hay Fever.**  
To the Editor of the SENTINEL:

The hay fever season is fast approaching, and it is therefore not out of season to say something about it. No doubt many would like to know something about the disease. According to my understanding, the disease called hay fever is a summer catarrh of the mucous membranes of the nose and throat, and is a most baffling affliction. A variety of names have been given it, and numerous drugs have been put forth as curative agents. No doubt many of these, at times, have good effects; yet there is no certainty in their action, and the prescribing of them has been a sort of mis-guesswork. In some cases this disease assumes the form of spasmodic asthma. There is often a discharge from the eyes and nose, with sneezing, mucous flux and catarrh. Dr. Tulzlar, in his etiology of hay fever, says:

"We must, more than in almost any other disease, draw a sharp distinction between the predisposing and the exciting causes; for it must be strikingly apparent throughout that this affection is exclusively confined to certain individuals, in whom certain definite predisposing influences were to be assumed. With these persons the disease appears year in and year out, with more or less regularity, often under the most different external conditions. In regard to sex, the male is less frequently afflicted, 104 females to 50 males being the proportion."

Dr. Blackley, an English physician, who has also written a work on hay fever, remarks (which remarks I am not inclined to accept): "The patients belong exclusively to the educated classes—the clergy, officers, lawyers, physicians, merchants and their relatives." I think all classes, constitutions and temperaments, particularly the nervous, are liable to this disease. As to the treatment, I regard local applications to be the most proper. My own experience has proved to me that those who have used local applications by the atomizer and other inhaling apparatuses, with well suggested therapeutical means to suit their cases, have found not only much comfort, but great benefit. Of internal remedies, one of the best I believe to be Folger's arsenical solution, taken in doses of two to five drops, three times a day, in water. Sulphate of iron, with or without sulphate of quinine, is most valuable if there be much debility. The distinguished German physician and savant, Helmholz, reported in Virchow's archive, that he had succeeded in finding vibrios in his own nasal secretions when suffering from this form of catarrh (hay-fever). He also states that a saturated neutral solution of quinine used for the nasal passages affords great relief. I cannot speak too well of that remedy if well and intelligently applied by the nasal atomizer. I think that this disease, and those who are predisposed to it, are aggravated by solar heat. I would, therefore, advise all those persons to keep out of the sun and pass the heat of the day in a cool, well shaded apartment. The diet should be generous, and a moderate allowance of wine or weak brandy and water should be taken with meals. Cold salt water bathing is good as a means of strengthening the system, as well as of conquering that morbid nervous sensibility of which the essence of the malady consist.

## A CLEAN SWEEP.

Water Works Ahead by

Every Ward in the City

Carried by Big

Margins.

A Good Day for Fort Wayne

—Old Fogies to the Rear.

The election to-day has passed off

very quietly. Within a few moments

after the polls opened it became evi-

dent that the water works were

going to carry the day by an

overwhelming majority. The

old fogies who have been making such

an informal racket seemed utterly de-

moralized. A few of them didn't show

up at all, and those that did

soon became discouraged at the

practical unanimity of the voters.

They had no organization

and at several voting places there

was no one peddling anti-water works

tickets at all.

The following returns were gathered

from the different wards between 2

and 3 this afternoon. They tell the

story:

## DIVERS DRUNKARDS.

Caught by the Cops and Carried

to the Cooler.

Life in Fort Wayne as illus-

trated at Police Court.

This morning as the mayor left his

house he pulled the door shut after

him but neglected to take his middle

finger away. As soon as he got it out

from between the door and the frame

he stuck it in his mouth and stood on

one leg and played a *tableau vivant*.

He stood first on one leg and then on

the other, and then he hopped around

and swung his arms until he resembled

a revolving chromotape, and nothing

could be seen but a confused mass

swinging arms, legs, coat-tails, straw

hats, etc., from which issued a chorus

from the "army in Flanders." Pretty

soon the mayor was seen emerging

from the mass, but the way his hat

perched on the side of his head, boded

no good to the poor unfortunates who

might be brought before the bar.

When he mounted his perch at the

city hall blood stood in his left eye,

knee deep.

"John Taylor, John Taylor, John

Taylor," John wasn't there but his

bond was. The fact of the matter

was John had been electrocuted on

water works, and when he saw Pete

Owens he told Pete to go home.

Pete wouldn't go but he took in

John, and that was just the same.

Default was taken, and the mayor

thundered for John Dillon.

John was drunk. He said so him-

self, and he knew. John is in favor

of water works. He was lying down

boy. The boy's father was asked

whether that was his son. He said:

"Well he was ketchin in my trap and

I guess I got to own him." Martin said

no. The boy's father said yes. So

the mayor split the difference and

said "maybe" and discharged the pris-

oner.

## A SAD CASE.

Poverty Drives a Respectable Wo-

man to Attempt Suicide.

What She Said to a "Sentinel"

Reporter.

Mrs. John Herrington lives at No.

123 Fairfield avenue, over a grocery

store in Herrington's block. She has

been for some time past engaged in

selling pictures and fancy work to sup-

port herself and husband, who is an

invalid. Last Saturday, she says, the

stock of provisions ran short, with no

prospect of getting a fresh supply,

whereupon she went to Rodeman's

drug store and procured a dime's

worth of morphine, which she took at

once. The effect was to render her

unconscious, in which state she lay

until yesterday noon.

A SENTINEL reporter visited her

this morning, to whom she stated the

above facts. She further stated that

she was trying to make an honest liv-

ing, but not seeing any way to gain

her subsistence any longer she thought

she would try a trip into the unknown.

She treated the matter very lightly,

and said she didn't know but what she

would have to try the experiment

again unless she could find some way

of making a living. She says she

doesn't know why the dose didn't kill

her, only—"In fact I didn't know just

exactly how much it would take."

The apartments are very neat and

clean, and although her reputation is

that of being rather quarrelsome, she

is said to be an industrious woman,

but cannot do much manual labor on

account of her own ill health.

The matter is undoubtedly one which

should be looked into by the authori-

ties and proper relief given the fam-

ily. The old gentleman is very child-

ish and does not realize what has been

done. The case is a very sad one.

Certainly no one should be allowed to

commit suicide in Fort Wayne from

fear of starvation.

## FOUND DEAD.

Mrs. Kramer of Spy Run Avenue

Found Dead in Bed—The Inquest.

This morning a woman was found

dead on Spy Run avenue, in Washing-

ton township. A SENTINEL reporter

was detailed immediately to find out

the facts in the case, and with the

hope that something sensational might

be developed, he lied himself to the

residence of the deceased, Mrs. Bar-

bara Kramer, wife of Peter Kramer,

night watchman at Pickard's foundry.

Dr. Bruebach was holding an exami-

nation of the body, and Coroner Gas-

ney was holding an inquest.

Peter Kramer, husband of the de-

ceased, testified:

"We were married in 1861, and have

lived happily together ever since. We

have four children, two boys and two

girls. About two weeks ago the de-

ceased complained of being sick and

took quinine for the ague. She was in

evening to take supper upon

special invitation of Mr. and Mrs.

Meyers. Afterwards he went with

them and drank some beer and soda

water. Then Mr. and Mrs. Meyers

went home and Mr. M. went to sleep.

Kelly started home another way, and

was met, as he says, by a gang of

roughs, who assaulted and stabbed

him for purposes of robbery. He says

that he and Meyers are the best of

friends, and that Meyers would never

never stab him—that is to say, he

hard.

## BREVITIES.

The Kramer inquest cost \$8.75.

John D. Olds is at Petoskey.

Mrs. M. Hedekin is at Vincennes,

Ind.

Joe Beegan leaves for Detroit to-

morrow.

O. N. Hinkle and Taylor Keyes

sailed for Auburn to-day.

Mrs. Seymour J. Smith is visiting

friends at Hillsdale, Mich.

George Miller, business agent of

Emerson's Megatharian Minstrels, is in

town.

Mrs. C. D. Gorham, who has been

very ill for several days, is very

better.

Joseph Eckert, of Madison street, is

suffering from an abscess on the right

side of his abdomen.

When the tax collector goes into

the county clerk's office there is a

general rush for coats.

Frank Hagan was arrested to-day at

half-past one by officer Connors for be-

ing drunk and insulting the passers-

by. He was stationed at Johnson's

barber shop on Barr street.

James D. Goodin, Peter Studakaker

and John Sowards, commissioners of

Well's county, accompanied by Jas.

Plessinger, sheriff of Wells county,

are in the city inspecting the county

jail.

Frank Hagan was taken before Jus-

tice Ryan, on two charges preferred

by his divorced wife, Mary Hagan;

one for provoking, the other for surety

of the peace. Both cases were dis-

missed.

A slight unpleasantness occurred at

the fifth ward pulls this afternoon be-

tween Charley Upplegger and Leonard

Shocker. Upplegger accidentally ran

his eye against Shocker's hat, and the

optic is bordered now with a deep rich

color.

A party of six wayfarers were cal-

loused last night. They were taken

before Justice Pratt, who refused to

take any cognizance of them. They

were then taken before the mayor as

ex officio J. P., who sent them over for

thirty days.

The number of missing cows and

calves leads to the belief that cattle

thieves are operating pretty freely

hereabouts. J. L. Williams, Scott

Blaine, Joe Lingard and J. Bookwal-

ter are each short one, and James

Hartman has lost two cows recently.
